Micro.

Micro. is an open project, a work in progress. We search the essence, the lowest common denominator. We search ergonomics, synthesis, that little thing can really change our lives for a better living. Do you know what we mean? A more lightweight and resistant material, a moldable coat for example. Beauty, comfort and the use you're going to make of our products is our primary target. We work with the best designers in the world to carry out this project. We dream a future where all you have around is better than ever.

Victorian

Many British homes built from around 1860 may have had a tiled front path, porch, hallway or kitchen tiled with colourful geometric tiles.

In fact, starting from the second half of the nineteenth century, geometric and encaustic tiled floors became more and more popular as they appeared in an ever-growing number of churches, grand Victorian villas and public buildings.

By the latter part of the century, colourful tiled floors and pathways had become an essential feature in even the most ordinary Victorian houses from Dover to Aberdeen.

These colourful geometric tiles are not only beautiful, but hard-wearing and functional too.

Using our state of the art cutting edge technology, we have produced a range of geometric Victorian fully vitrified tiles suitable for indoor, as well as outdoors, designed to faithfully recreate the most pollard original patterns and colours.
